Las Vegas, NV | stranskydesign@gmail.com | (915) 474-2746

Senior developer specializing in performance, accessibility, and scale. Strong design background, 15+ years producing enterprise software. Shipped on a variety of platforms including Node.js and .NET. Showcased on *Jeopardy!*, Nook Color and the Smithsonian.

Front End, UI, UX, Tools, DevOps

EXPERIENCE

Senior Software Developer | College Loan Corporation | August 2020 – Present

- Improved Lighthouse scores from a C to an A across company properties.
- Reduced development time by 40% by consolidating 6 projects into a monorepo.
- Cleared thousands of legacy WCAG violations.
- Led the design and development of multiple financial calculators.
- Built custom low-code data-viz extensions for our data science products.

Frontend Web Developer | Vegas.com | September 2019 – March 2020

- Increased conversion rates through data-driven A/B testing of high-traffic pages.
- Established formal testing and component patterns improving code stability across React and legacy codebases.

Frontend Developer III | Konami Gaming Inc. | June 2018 – September 2019

- Revolutionized 20-year-old Java interfaces by engineering a React-based thick client with embedded Chromium.
- Eliminated substantial Oracle licensing costs by researching and deploying an open-source Chromium integration framework for Java.
- Served as the resident React lead, standardizing production pipelines and DevOps best practices.

Ed Tech Course Designer | 1Prospect Technologies | October 2017 – February 2018

- Designed mission-critical UI for instructional modules used by personnel in active military zones.
- Engineered a rapid development pipeline that accelerated production for small-scale course materials.

Lead Developer | Distance Course Design & Consulting, University of Hawaii | August 2015 – October 2017

- Reduced second-site build time by 90% (from 1 year to 1 month) by engineering a reusable parent theme architecture.
- Built a secure, enterprise WordPress portal for HR featuring role-based PDF rendering and custom navigation walkers.
- Developed the "Roots Course" framework enabling structured e-learning with xAPI/LRS integration and assessments.

Front End Project Manager | Superb.net | August 2014 – August 2015

- Modernized antiquated web infrastructures with responsive layouts, automated build tools, and modern CSS preprocessors.

- Implemented Agile planning and standardized coding protocols to increase team velocity and project predictability.

Software Developer | Leicher Web Design | August 2011 – April 2014

- Architected data-driven reporting systems using SVG-based charting APIs and server-side PDF generation.

Software Developer | Automata Studios | October 2009 – April 2012

- Engineered highly visible interactive installations for clients including IBM (Watson Jeopardy project) and the Smithsonian.
- Developed cross-platform mobile reader applications for the Barnes & Noble Nook Color using ActionScript and JavaScript.

EDUCATION

Full Sail University - B.S. Game Art (Salutatorian)
